

I currently listen and support the K-Love station in my area. This station provides wholesome and family-friendly programming that my entire family enjoys. It is vital that our children and families are able to tune to music such as there are so many unhealthy alternatives. If K-Love were to be displaced by an LPFM broadcaster we would not have a station to listen to that spans all generations in this manner. Also, K-Love is used to help promote local wholesome functions that are used not only by our family but also by our church family and youth. I truly believe that ensuring that K-love is able to remain on the air and use the FM translators is in the public interest.
